

# Worm Composting!

If you're *squirring* for a **new composting method**, join *Stark Soil and Water Conservation District* and *Plain Township* for a wiggling workshop! We will explore how red wiggler worms expedite the composting process by consuming over half their weight in kitchen scraps per day!

Interested participants can learn how to begin and maintain a vermiculture system as well as utilize their benefits on **Wednesday September 13, 2017, from 6 to 8 pm at the Plain Township Administrative Offices, 2600 Easton St., Canton, OH 44721**. The cost is **FREE**, and those in attendance will receive a small quantity of worms to produce their own **vermicompost!**

**To register**, please contact Stark Soil and Water Conservation District at 330-451-7645, by **September 6, 2017**.
