Professor Clawd Teaches, Water Goes Where Circle or Square?

or

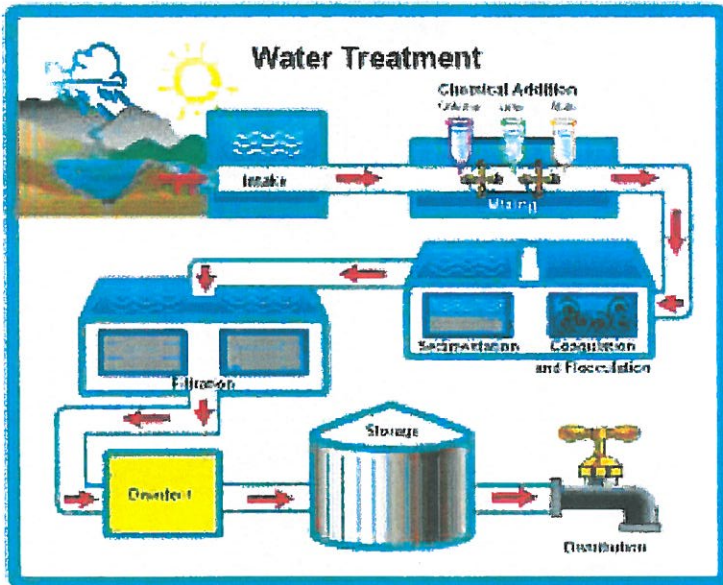

Keeping
Our
Water
Clean!

The Difference Between Storm Sewers and Sanitary Sewers

Water Goes Where..... Circle or Square?

Waste water from your sinks, showers, toilets, and washing machines travel through the sanitary sewer system to a waste water treatment facility where the water is treated before being discharged.

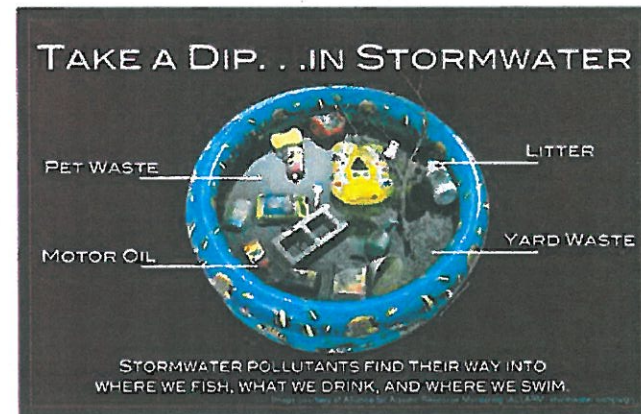

CIRCULATES THROUGH A WATER TREATMENT FACILITY BEFORE ENTERING WATERWAYS

Stormwater runoff is rain or snowmelt that flows over the ground. As it flows, it can pick up debris, chemicals, dirt, and other pollutants that contaminate our water. Anything that enters a storm sewer is discharged untreated into waterbodies that we use for drinking, fishing, and swimming.

WATER IS **NOT** TREATED BEFORE IT ENTERS DIRECTLY INTO WATERWAYS

Do your part to keep our water clean!

ONLY Rain Down the Drain!
